KEEP BESIDE YOUR SCREEN

Three minutes. Nine cues.

Open PRESENT.html > Begin presentation. Darren clicks Next once or presses Right Arrow once at each cue change. Do not click the model. The separate demo is a separate file.

0:00 - 0:20 Darren CUE 1

Team, Grundfos purpose, planner, synthetic working software.

0:20 - 0:40 Darren CUE 2

Compare New York and Lansing. Candidate urban users. Say "Nandan."

0:40 - 1:05 Nandan CUE 3

Isolated exchanger > heat pump > pipes > buildings. Assumed source heat plus compressor input.

1:05 - 1:15 Nandan CUE 4

Summer demand falls. Storage shifts hours, not seasons.

1:15 - 1:25 Nandan CUE 5

Export outage: zero captured heat, backup visible, cooling independent. Say "Jason."

1:25 - 1:50 Jason CUE 6

Forecast 24 hours > allocate within limits > community priority > replan hourly.

1:50 - 2:15 Jason CUE 7

Forecast error improves; margin falls. Check bands and physical limits. Say "Brian."

2:15 - 2:40 Brian CUE 8

Conditional annual model: NYC vs Lansing capital, NPV, and carbon.

2:40 - 3:00 Brian CUE 9

Ownership, investment risk, community value, next measurement gates. "Thank you."

Lost your place? Find the current cue number and read that paragraph. If time is called, Brian says: "Heat Commons makes heat-reuse trade-offs visible before anyone builds. Thank you."
